ABOUT ME

Results-driven Business Analyst and Computer Science graduate with a strong foundation in data science and full-stack development. Adept at bridging the gap between technical teams and business stakeholders to drive digital transformation. Proven expertise in process automation, SDLC management, and requirements engineering to optimize workflows and deliver impactful, user-centric software solutions.

EDUCATION

2022 - 2024

Swinburne University of Technology

Bachelor Degree in Computer Science Major in Data Science

EXPERIENCE

2023 - 2024

Final Year Project

CJOP Social Media App

- **Full-Stack Android Architecture:** Designed and developed a responsive, native-like Android social media frontend using React Native, powered by a Node.js backend.
- **Database & Real-Time Sync:** Implemented Supabase for robust database management and seamless real-time data synchronization across the application.
- **Resful API:** Integrated Twilio SMS OTP to establish secure and reliable user verification protocols.

2024 - Present

HCK Capital Group

Business Analyst

- **Sales Process Automation:** Re-engineered a legacy manual claims workflow into a fully automated sales verification process, streamlining data flow from initial import to final approval.
- **System Criteria & Validation:** Implemented automated cross-checking mechanisms within the system to independently evaluate submissions, drastically reducing human errors such as duplicate claims.
- **SDLC & Vendor Management:** Acted as the primary liaison between business users and third-party development teams, ensuring clear communication of business requirements, project scope, and technical deliverables throughout the project lifecycle.
- **Timeline Management:** Managed project schedules, tracked development progress, and coordinated cross-functional activities using Microsoft Planner to ensure project milestones and release timelines were achieved.
- **WordPress Development:** Developed and customized functional web platforms utilizing WordPress (Elementor), writing custom CSS overrides directly within the page builder to achieve precise design layouts and responsive styling.

TOOLS

- | | | | |

CORE SKILLS

Website Development:

Developed and customized responsive websites utilizing WordPress (Elementor), custom HTML, and CSS, seamlessly integrating plugins to enhance site functionality.

Project Coordinate & Delivery:

Coordinated full-cycle software development projects by aligning business requirements with vendor capabilities, ensuring timely delivery from gap analysis to final deployment.

Gap Analysis & Solution Design:

Conducted comprehensive gap analyses to map complex data requirements, bridging current business constraints with optimized, automated technical solutions.

Quality Assurance:

Orchestrated comprehensive User Acceptance Testing (UAT) phases to validate new features and ensure strict alignment with executive stakeholder requirements.

App Development:

Designed and developed full-stack, cross-platform mobile applications utilizing React Native, integrated with Node.js backends and RESTful APIs.

Product Design:

Focus on the End-to-End User Journey: "Bridges the gap between backend automation and frontend usability by designing logical user journeys, data-preview layouts, and clear notification loops that simplify complex data verification for the end user."
